## FIRST RESPONSE

PROTECTING PEOPLE PRESERVING LIFE

GKY is the authorized dealer for Dynamic Air Shelters in Iraq, Kurdistan Region and Nigeria.

# FIRST RESPONSE

## DYNAMIC AIR SHELTERS

### Disaster & Emergency Sites

Wherever you need superior protection for workers in challenging or dangerous work environments, Dynamic Air Shelters is the solution.

Dynamic Air Shelters (DASL) are used extensively at disaster and emergency sites around the world. Rapid protection for first responders, victims and supplies allowing effective treatment; so preserving life.

Dynamic Air Shelters' technology provides first response teams with highly durable, functional work spaces and immediate protection from environmental, biological, chemical threats. Wherever response time is critical, DASL can be rapidly deployed. When people need hospital treatment in a disaster zone we are in our element.

### Rapid Deployment Anywhere

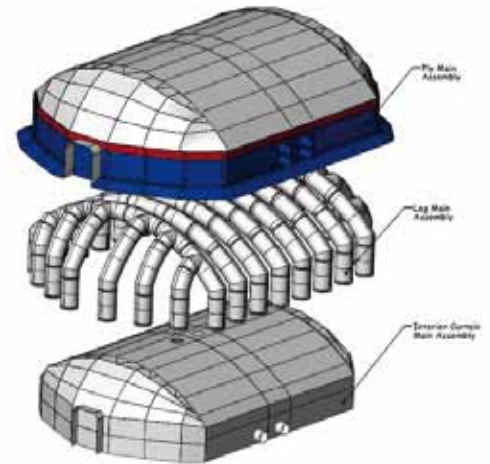

Dynamic Air shelters Lightweight Re-locatable Shelters (LRS) can be fabricated to meet many differing needs; from indoor decontamination, isolation wards, feeding stations to large field hospitals. Each Dynamic Air Shelters LRS delivers safe, high speed deployment. Some units can be set up in as little as ninety seconds, providing immediate protection from the weather.

### Advantages/Benefits

- Wide range of sizes and modular configurations that can include: Electrical, lighting, HVAC and air filtration systems run from a generator or mains.
- Manufactured to the highest standards and certified to meet the most stringent national fire codes NFPA701.
- On-site ballistic and blast resistant protection reduces blast effect by 50%.
- Quickly and easily redeployed by a small work crew, providing immediate functional interior work space with positive or negative air flow.
- Customized as stand alone or modular units or as multi-functional complexes in a variety of configurations.
- Command Posts.
- Hospital Surge Systems.
- Earthquake proof; also ideal for positioning after an earthquake as will not suffer aftershock damage.
- Immediate protection from weather including; heavy rains, snow, high winds, hot or freezing temperatures and can withstand up to category 3 hurricanes.

### Uses

Dynamic Air Shelters are used across a broad spectrum of industries, for the first responder they can be rapidly deployed to set up as a mess hall, kitchen, hospital, warehouse, offices, command and control centre, incident room, among many other applications, all deployable within hours of arrival.

### Excelling in the Field

Dynamic Air Shelters' approach to business is one of service with confidence. After fourteen years of research and development of our innovative Lightweight Relocatable Shelters (LRS) systems, we are in our element, providing shelters that are technologically advanced, reliable and above all, customer-oriented. No matter where your disaster or emergency situation takes you and your employees, you can rely on Dynamic Air Shelters for the best in LRS.

### Dynamic Air Shelters: Made to Measure

Dynamic Air Shelters can be made to measure, our specially trained engineers design structures with varying sizes from 400 - 40,000 sq feet. Bespoke designs can be made; company logos, relief mission statements, military camouflage. Your choice; interior layouts; partitions, doors, HVAC, lighting, ventilation, furniture.
